### Contact Details:-

Ajanta Pharma ; Factory/plant, Gut No. 11/12/14/15, Chitegaon, Paithan Road, Aurangabad  
District – 431105

### Visiting Areas –

- 1. Warehouse:-** A warehouse is a place where the raw material is stored. The height of this warehouse is approx. near about 45-50 feet. Fifteen pulleys are placed in the warehouse whose functions are to transfer the raw material from one place to another. It is important because the drug is in large quantity and it is very important to store such a large quantity of drug in a big room. 15- 20 workers are there in the warehouse.
- 2. QC Department:-** The QC Department tests raw materials before they are used as well as in-process materials at key points in the production process. The finished product is tested to determine whether it was made according to the needs of GMP and meets all of its specifications. They also monitor the stability of product, making sure that it meets all specifications during shelf-life.
- 3. Tablet punching machine:-** Tablets are made by compressing a formulation containing a drug or drugs with excipients on stamping machines called Punching Machines having punches as the basic component which are used for compressing the granulation within the dies. These punches control the process of filling, compression and ejection.
- 4. Tablet granulation machine :-** Pharmaceutical granulators are used for producing uniform dense granules they are universally accepted within the pharmaceutical industry for wet granulation and dry mixing of particles/ ingredients. Granulators ensure fast, efficient and uniform mixing or

granulation of raw material/particles. Over sized granules are broken down into a uniform size to ensure better blending.

5. **Strip packaging machine:-** The product is fed through hopper and feeding device flows to the heat sealing roller cavities, the desired laminated foil from the two rollers is drawn on the sealing rollers which packs and seals the products continuously. The sealed strip passes through the vertical and horizontal cutters to get desired strip sizes. This machine is extensively used to pack tablets, capsules, caplets, coated tablets, soft gelatine capsules.
6. **Blister packaging machine:-** It is a form of tamper resistant packaging that provides excellent environmental protection and the product has more aesthetic value
7. **Dissolution apparatus :-** It is used to study the in-vitro rate of dissolution of a drug. The rate of drug absorption for acidic drug moieties that are absorbed high in the GI tract is often determined by the rate of drug dissolution by the tablet by dissolution apparatus.
8. **HPLC:-** In HPLC system pressure is applied to the column, forcing the mobile phase through at much higher rate. The pressure is applied using a pumping system. The action of pump is critical, since it must not pulsate and mix up the sample being separated with the solvent, causing it to lose resolution.

Mr.Sandip Patil Sir delivering information about the Pharma Plant and Student observe the Companies.

Visit to Ajanta Pharma plant Chittagaon Aurangabad (MS)

**Interaction with students:-**

It was a good experience, which has provided exposure to the B.Sc and B.Voc students with industrial life. Ajanta Parma Company Manager Mr. Lalit Amru Sir was discussed with the student. They said after graduation or post-graduation you are eligible for the work as pharma industries. Which knowledge is used in such type of companies for the available requirement. Then after Mr.Lalit Amru and A. Joshi Sir also appreciated our students after the question answer sessions. Visit seems to be very informative and gives good learning experience. Students were well mannered and disciplined throughout the Tour and no injury or anything bad happened during the industrial tour.

All the Staff members and Students are extremely thankful to honorable Principal, Officials at organizations who grant the permission of visiting their organization and guide the students.
